

Why Canva?

- Popular and easy-to-use visual media content creation tool
- Versatility and flexibility given to the user in how the tool can be used

EXPLORE

Task: Generating and Presenting an AI Lecture

1. Generate a presentation slide deck using the following fill in the blank prompt: *Design a lecture about (a topic you teach/like to teach/know a lot about).*
2. Open the generated presentation in full screen and deliver a 2-minute lecture with the provided slides.

Tool Limitations

- Access to this feature is behind a paywall
- Limited to 7 slides generated
- Text, images and styling can be unrelated to the requested topic
- Content limited to text and images, cannot include any other forms of multimedia content (eg. videos, GIFs, etc.) or transitions

REFLECT

- What can this tool do?
- What can't this tool do?
- Did the generated presentation meet your expectations? Would you present it at a meeting, conference or class?

EXTEND

- In the wake of tools like this, how valuable are presentation slide decks? Does this open the door to a new standard/medium for presentations?
- Can you identify any issues related to bias, accessibility or relevancy in the generated presentation?
